Objective

A passionate and results-oriented junior web developer with a strong understanding of front-end, back-end, and database development. Eager to contribute to a dynamic team environment, leveraging strong problem-solving and communication skills to bring innovative solutions to the table.

Skills

Frontend: Html | CSS | Tailwind | JavaScript | React | Redux | Next.js

Backend: Nodejs | Express.js | JWT | MongoDB

Tools: GitHub | Firebase | Vercel | VS Code | Stripe | SSLCOMMERSZ | Socket.io | Email.js

Soft Skills: Teamwork, Hardworking, Active Listening, Responsibility, Problem Solving, Time Management

Experience

Frontend Developer Intern

Texon Limited | East Shewrapara, Mirpur, Dhaka

October 2024 – December 2024

- Converted Figma designs into responsive web pages using Next.js and Tailwind CSS.
- Delivered responsive, high-quality designs on time, meeting performance and accessibility standards.
- Integrated RESTful APIs to dynamically fetch and update data across multiple pages.
- Received positive feedback for clean, maintainable code that aligned with design specifications.

Projects

Personal project: BikroyElectronics | An E-commerce website [Visit Website](#) [Client Side Code](#) [Server Side Code](#)

Features:

- User-friendly interface with advanced search, filtering, flash sales, Cart, and Wishlist functionality.
- Admin features for managing products, orders, users, categories, coupons, flash sales, and viewing statistics.
- Secure JWT authentication, admin verification, account updates, order history, and email sending via EmailJS.

Technologies: React | Redux | Tailwind | Email.js | Express.js | MongoDB | SSLCOMMERSZ **Timeline** 60 Days

Team Project: Asset Hexa | A Money Management Website

[Visit Website](#) [Client Side Code](#) [Server Side Code](#)

Feature:

- Integrated real-time notifications for blog and business updates using Socket.IO.
- Developed full-stack budget management features, including adding, deleting, and editing budgets.
- Created UI components and completed most of the frontend for managing income, expenses, and transfers.

Technologies: Tailwind | React | Node.js | Express.js | MongoDB | Email.js | Socket.io | Stripe **Timeline** 50 Days
